## SUMMARY

Mathematician with a Master's in Big Data Analytics, currently starting a career as a Data Analyst with a focus on Risk Analysis. Passionate about applying analytical and technical skills in financial and technical sectors, with experience using SQL, SAS, and Excel for data processing, statistical modeling, and reporting to support decision-making in the banking industry.

## WORK EXPERIENCE

**Risk Analyst** September 2025 - Present  
*Bankinter Consumer Finance – Madrid*

- ❖ Currently building experience in credit risk analysis and data-driven decision-making, focusing on monitoring metrics such as Probability of Default (PD) and portfolio performance indicators. Extract and process data using SAS and SQL, while developing dashboards and reports in Excel to analyze user behavior, risk trends, and credit policy effectiveness. Applying analytical skills to support insights and improvements in both risk management and broader data analysis projects.

**Professional Tennis Coach** January 2020 – Present  
*Tie-Break Tennis - Madrid*

- ❖ Developed and delivered personalized tennis training programs for players of all ages and levels, focusing on technical, tactical, and physical improvement. Organized internal tournaments and prepared athletes for regional competitions, fostering motivation and resilience.

|-------------------------------------------------------------|--------------|
| Master's Degree in Advanced Analytical Methods for Big Data | June 2025    |
| Universidad Carlos III, Madrid                              | GPA: 9.1 /10 |
| Degree on Mathematics                                       | June 2024    |
| Universidad Autónoma, Madrid                                | GPA: 8.2 /10 |
| Excellence Program High School Diploma                      | January 2020 |
| IES Palas Atenea, Torrejón de Ardoz                         | GPA: 9.7/10  |

## ADDITIONAL COURSEWORK & PROJECTS

### Coursework from Economics Degree – Accounting and Financial Statement Analysis

Completed university-level courses covering the fundamentals of financial accounting and interpretation of financial statements. Acquired solid understanding of financial reporting and economic decision-making.

### Towards Fairer Recommender Systems: Models, Metrics, and Trade-offs

This Master's Final Project examines the main methodologies in recommender systems, including content-based and collaborative filtering models. It also focuses on fairness, exploring definitions, metrics, and strategies to integrate fairness constraints into algorithms. The aim is to improve recommender systems in terms of both accuracy and equity.

## SKILLS

### Technical Skills:

- Languages: Python, R, SQL, SAS
- Techniques: Data Cleaning, Visualization, Statistical Modeling, Machine Learning, Excel

**Soft Skills**: Problem-solving, communication, teamwork, leadership.

**Languages**: Spanish (native), English (fluent)
